

Dear Madam, dear Sir,

Welcome to the latest issue of our Symtavision newsletter in which we inform you about current news and events on scheduling analysis, verification and optimization for reliable real-time systems design and integration for ECUs, networks, and whole embedded architectures. Further information on Symtavision can be found at www.symtavision.com.

Your Symtavision Team

In this issue

- 2nd SymTA/S NewsConference on October 8 – 9
- FISITA and more Upcoming Events
- Presenting our team:
Dr. Uwe Scholz new VP Sales & Marketing
- SymTA/S Training in Braunschweig, October 7 – 8
- New VDI Seminar on “Real-Time Analysis” starting October 2008

Call for Participation:

2nd SymTA/S NewsConference on October 8 – 9

Timing analysis is quickly becoming established practice at OEMs and suppliers for development tasks ranging from early architecture conception to certification of safety-critical functions. We are therefore expanding our yearly communication platform for users and developers of SymTA/S as well as everybody interested in timing analysis and would like to discuss and share with us your questions, experiences, and requirements.

Talks by Continental, Daimler, ETAS, Gliwa, Symtavision, TU-Braunschweig, and Volkswagen cover timing aspects from ECU-level to system-level, from early to late design stages, from current industrial practice to future standardization to research challenges.

Please register by September 19 at

More Upcoming Events in 2008

- September 14-19: **FISITA** Congress and Exhibition, Munich, Germany, Booth F19, Hall B0
<http://www.fisita2008.com/>
- September 22-23: 4th International CTI Forum "Steering Systems", Düsseldorf
<http://www.iir.de/steering/>
- October 22-23: 2. AutoTest Fachkonferenz, Stuttgart
<http://www.fks.de/unternehmen/veranstaltungen/autotest-2008/>
- November 4-6: driveIT, Stuttgart
<http://www.hundkmesse.de/english/hk-english/driveit.html>

Complete list: <http://www.symtavision.com/events.html>

Presenting our team:

Dr. Uwe Scholz new VP Sales & Marketing

Uwe Scholz is responsible to further drive the company's performance, effectively in global Sales and Marketing operations.

Before joining Symtavision, he was responsible for the simulation of business-relevant data (BI) at VisualIndustries, where he led the sales and marketing department. Uwe Scholz further held management positions at MSC, SGI, DEC, and Tektronix.

SymTA/S Training in Braunschweig, October 7 – 8, 2008

During this 2-day training, half of the time we will be teaching the technology background and how to work with SymTA/S, while the other half will be used to develop and analyze individual models of your specific interest. A 4-week evaluation period of SymTA/S and all necessary modules are part of the course fee.

There are still open seats for this training. If interested, please visit <http://www.symtavision.com/training.html> and **register by September 19.**

The training is co-located with our yearly NewsConference on October 9. Training attendees are eligible to attend the 2008 NewsConference free of charge.

VDI Seminar on “Real-Time Analysis” starting October 2008

VDI and Symtavision establish a new seminar „Real-time analysis of automotive software, ECUs and networks”. Function designers, software and system developers, architects, integrators, test engineers and network responsables at OEM, Tier-1s and engineering houses will obtain a „big picture“ on timing in automotive systems incl. an overview on current best practices, best-in-class tools and future solutions. Chose among three possible dates:

- October, 29-30, 2008: Pforzheim
- December, 9-10, 2008, München-Freising
- January, 20-21, 2009, Frankfurt (Main)
